The Land's End is a fine rugged piece of coast which gains an additional attraction owing to its being the most westerly point of England, the Lizard being the southernmost. Off the coast are many isolated masses of rock, forming a considerable menace to navigation, and to indicate the danger, the Longships Lighthouse has been erected on Carn Bras. Its lantern is 123 feet above high-water mark.

All good wishes -
many happy returns
of the day.
